New Yellow Tea Rose

ALLANOE FRANCO-RUSSE

No. 2. A superb new golden-yellow ever-blooming Rose. It is a strong, upright grower and constant and abundant in bloom. The large, cupped form of flower is abundantly covered with golden-yellow double flowers of beautifully rounded form. A deep golden-yellow, sometimes shaded with touches of crimson and pink—just enough so to make the flowering head strikingly fragrant, and quite hardy with usual protection. This is the stiffest stems of all Tea Roses, which, coupled with its large, cupped form of flower, makes it a fine rose to stand up well at the head. It takes rank with Marenchel Nel and Etolie as a yellow Rose. Price, 20 cents each, five for 90 cents; two-year-old plants, 50 cents each.

The Magnificent New Red Rose

ETOILE DE FRANCE (Star of France)

No. 3. It is undoubtedly the most magnificent new red Rose introduced for many years. It is a strong, healthy grower, hardy, and a quick and abundant bloomer. Makes exceedingly beautiful, large, pointed buds and extra large, perfectly double flowers from three to five inches across. Its magnificent color, which is of a deep rich crimson, and the ruffled edges of the petals, give it a tinge of crimson, and the freedom of bloom make it particularly valuable for planting in the open ground, while the large size of its buds and blooms are especially desirable for cut flowers. Price, 20 cents each, three for 50c; large two-year-old plants, 50c each, three for $1.25.

SPECIAL OFFER—For 75 cents we will send you, postpaid, the Four Glorious New Roses, Helen Good, Etoile de France, Wellesley and Alliance Franco-Russe; in the large two-year-old size for $1.25, postpaid.

READ REMARKS ABOUT ORDERING, CAREFULLY
It Will Assist Us Greatly in Getting Your Orders Shipped Promptly

Our Prices are Strictly Cash—The proper remittance must in all cases accompany the order, and should be in closed with the payment. We can discount no money in any amount received. We keep no book accounts with our customers.

Lost Orders—Letters are sometimes lost, stolen or destroyed in transit, so that they fail to reach us and you are never heard from. Please remember that however safe the U.S. mails are, there are losses and delays liable to occur. In some instances mails are burned up in railroad wrecks, and delayed for days in snowbound trains or in bad washouts. Therefore business prudence dictates that the remittances must be made in the following manner, so that in case of loss duplicates can be had.

Register all Orders—It is possible that some of the busiest season others may have orders ahead of yours, which must be filled in rotation. Order early.

Register your Orders—Orders can now be had at all post offices, and are absolutely safe. If the letter enclosing it is lost, send us the number, date, amount, the office at which it is taken, and the approximate date on which it will fill the order at once and apply for a duplicate of the lost money order, which the government will furnish in such cases.

New York or Chicago Bank Drafts drawn by your local bank and made payable to our order are good, and can be had at all banks. If lost, the bank will issue a duplicate. Express Money Orders are one of the cheapest and best ways of sending money. Perfectly safe, because if lost a duplicate can be had by applying to the express company.

Do not send personal checks, as it costs twenty-five cents to collect them by the banks, and we cannot accept them unless the cost of collection is added; then some delay is caused in making collection. Also, Register all Orders—When you cannot get money orders, enclose the money—either notes or coin—and have it registered by the postmaster and the money counted in his presence.

Cost of Remitting Free—On all orders of fifty cents and over the cost of remitting by any of these methods may be deducted. We settle business in accord with the custom of your order. Do not expect us to send you a single plant for this where your order calls for seeds entirely; it is against our interest, for the cost of packing and postage amounts to more than the plants.

No Goods Sent C. D. O., unless cash to the amount of order is enclosed. We do not expect to send goods C. D. O., at any time, and only do so on rare occasions. The cost of collection charges is quite an unnecessary item, and when prices being given, we cannot conceive of the necessity of having goods so sent.

How to Get Your Plants Free

There are those who do not wish to spare the money or do not feel able to purchase flowers, although they dearly love and enjoy them, and there are those who take pleasure in interesting their friends and neighbors in the cultivation of plants—for indeed all communities are better off for a liberal display of flowers. We wish to call the attention of all such persons to the fact that while we are working for us they are at the same time providing themselves with plants at no outlay of money to themselves, but are practically getting them free, and that with our liberal inducements in clubbing rates, premiums or discounts any person may have very lucrative employment for spare time. You do not know how easily you can secure an order from among your friends, and thus secure the benefits of these most liberal offers until you try. Individual orders are allowed same discount as club orders.

How to Send Club Orders

Keep each person's order separate, giving his or her full name, with the amount of the order. Then make your selection of the amount due you, naming the plants desired as your discount or premium, signing your name as the Club raiser.

Remember that the Geter-up of the Club is entitled to all discounts. We cannot allow each member of the club to select discounts, etc., and then allow the geter-up of the club to select another discount. We will, however, add one plant of our selection for each dollar's worth that any one member of your club may send.

Mail Clubbing Rates

Individual orders allowed the same discount as club orders. Your choice from catalogue. Raise a Club, and secure your plants free.

Express Clubbing Rates

Individual orders allowed the same discounts as club orders. The discounts or premiums we offer you to have your plants sent by express will more than pay the express charge on them, and you usually get larger plants.

Please Notice: Do not include collections or special offers in making up your discounts, as it applies only to price per single plant, bulb, or packet of seeds. We cannot send your order at one time at all the Discounts or Premiums in your order when you send it, otherwise we add the Premium of our own selection.

Special Express Rate—A twenty per cent. reduction on Plants, Seeds, Bulbs and Small Fruits is now granted by the express companies on the regular merchandise rates. Express charges are now very moderate, minimum charges being thirty-five cents on small packages.

Please Remember to Keep Your Seed and Plant Orders Separate. It will greatly facilitate the filling and packing of your orders promptly. Use our Order Sheet. If you need more, write us, and we will gladly mail them to you at once.

Our IDEAL LIST of SUPERB EVER-BLOOMING ROSES

For general planting, more especially in open ground, this class excels all others. One-year-old plants, such as we send by mail, bloom the first and earliest year, from early spring until severe frosts. Two-year-old plants, of course, yield a greater profusion of flowers, owing to their size. The flowers are noted for their exquisite coloring and delightful fragrance. Hardly everywhere in open ground with protection of litter, leaves, evergreen bouquets or similar material. Plant liberally one-year-old Roses; the harvest of bloom they give the first year compensates for the trifling outlay. Anyone can succeed with them.

In the "IDEAL LIST" we have classed the best of the newer and rarer Everblooming Roses introduced in the later years of Rose culture. Every variety is tested and tried. WE KEEP THE BEST AND DISCARD THE REST.

GRAND PARLOR FERNS
THE GRAND NEW TARRYTOWN FERN
Nephrolepis Elegantissima, or Feather Fern—It is a sport from the Piersoni Fern (Nephrolepis Piersoni), but it is very much more beautiful. The small side pinnae are again subdivided, presenting an exquisite and beautiful effect, changing the entire character of the fronds, the side pinnae standing at right angles to the midrib, making both sides of the frond equally beautiful—entirely different from any other Fern. The plant is very dwarf, only about one-half the height of the Piersoni Fern, and of very much more compact habit.
Price, strong young plants, 15 cents each; two for 25 cents; extra strong plants, from three-inch pots, 25 cents each; large plants from four-inch pots, 50 cents each.

NEW PARLOR FERN, NEPHROLEPSIS SCOTTII
It is a condensed form of the Boston Fern, with valuable characteristics added which are not evident in the parent, an average plant in an eight-inch pot having two hundred fronds. The fronds average about twenty inches in length, and three inches in width at the widest point; the pinnae are very closely set, so that they overlap, making a more finished frond than the parent. It has a crispness and hardness about it which is superior to the parent. It grows very freely, and its character is established in the smallest size.
Price, 15 cents each; large plants from four-inch pots, 50 cents each; extra strong plants from three-inch pots, 25 cents each.

THE BOSTON SWORD OR FOUNTAIN FERN
Of all decorative plants for house culture this is perhaps the most imposing and satisfactory. Plants form an immense number of graceful, drooping fronds, varying in length from two to five feet, and always of a fresh, healthy, and beautiful green color. These fronds keep in perfect condition for years; we cannot too highly recommend it.
Price, young plants, 10 cents each; strong plants, 25 cents each; extra large plants from four-inch pots, 50 cents each.

CALIFORNIA PRIVET HEDGE
BEAUTIFY YOUR SURROUNDINGS Remove the unsightly fence; increase the value of your property by planting a Privet Hedge. It will do almost as well on poor soil as on good, in all situations and under all conditions.

Of all ornamental hedge plants this is the most popular, and more of it is planted than all others combined. Its foliage is a rich dark green, and is nearly evergreen, remaining on the plant until proxer. It succeeds under the most adverse conditions, such as under dense shade of trees, where other plants would not exist. It is a vigorous grower, with leaves of a good rich shade of green, almost evergreen, the new leaves putting forth as the old ones fall. It can be pruned at any time, and the cut over appears the same next season. It looks and the better hedge will be formed. In order to secure a dense hedge from the base up the plants should be severely pruned the first two seasons. Insects never attack it, and it never grows dull, but holds its beautiful green foliage throughout the season.

The most advantageous manner of planting is in double rows, the two rows being about eight inches apart. The smallest size plants here offered should be set ten to twelve inches apart in the row, alternating the plants, while the larger sizes may be set from twelve to fifteen inches apart. It can be planted in a single row, plants eight to twelve inches apart, but we recommend for a more compact hedge to plant a double row, each plant six inches apart, three inches off the line, in this manner.

Price for plants ten to fifteen inches, 10 cents each, three for 25 cents; per dozen, 75 cents.

Price for plants eighteen to twenty-four inches, 15 cents each, two for 25 cents; per dozen, $1.00.

Please to Remember to Keep Your Plant and Seed Orders Separate. It will greatly facilitate the filling and packing of your orders promptly. Use Our ORDER SHEET. If you need more, write us, and we will gladly mail them to you at once.

MUCH DEPENDS ON PROPER PLANTING. The Depth to Sow Seeds. For all seeds the soil should be mellow, and for small seeds the surface should be raked very fine. An old rule with gardeners is to cover seeds so that the soil over them shall be twice the thickness of the seed. But something depends upon the character of the soil. If it is clayey and liable to bake, it is a good plan to have some sand to spread over the seeds, as this will allow the young plants to push through easily. After planting, press down and firm the soil over the seed.

Our Guarantee. That our interests are mutual; your success is ours. That our seeds are fresh and genuine and will produce power and fully tested. However, seeds of the same variety, or same character, may arise from seed, improper sowing, too deep or too shallow, or too dry or too wet soil. Young plants are liable to various accidents—cold or dry air may check growth or destroy them; insects may attack them above or below the ground; and a great many other contingencies may arise to prevent the seeds from giving satisfaction, and for all these reasons it is impractical to guarantee seeds.

NEW MASTERPIECE, or "RUFFLED GIANT" PANSIES

The truly giant-sized flowers of this wonderful Pansy are of the most distinct and striking character, the petals having a rich velvety substance and being heavily ruffled or curled, giving them the effect of a finely double flower. The originator in Germany has shown many flowers of the Giant Black Peacock Emperor Pigeon Pansy, which measured the width of the petals, and if the ruffles were spread out would measure nearly twice as wide. The colors are white, silver and pink, and the blushed or marked in ray-like veining with contrasting colors in most beautiful and brilliant effects. The marmmoth size, richness and beauty of color combined with the distinctly ruffled or ruffled character of the petals, makes this one of the most distinct and interesting novelties in Pansies ever developed.

LAWN GRASS SEED—EVERGREEN VELVET

As a guide for the proper quantity to order, we may state that one quart of Lawn Grass is sufficient to thoroughly sow an area twenty by fifteen feet—three hundred square feet; three to five bushels will be required for one acre. It should be borne in mind that in order to produce the best results, grass seed for lawns should be sown twice as thickly as if sown for hay—one quart of seed to about one and one half square rods. At the price per bushel and per peck we deliver to express company here or on board cars. No charge for bags or packing.

Lawn Mixture—It is a compound of Grasses that ripen successively, thereby always presenting a cheerful appearance. Lawns sown with only one or two grasses turn brown under hot sun, and remain in that condition until the cool months of autumn revive them. The mixture that we offer is one of the best on the market, and can be relied upon to produce the very best results. Sew four bushels to the acre. Weight per bushel, fourteen pounds. Price, per quart, 25 cents, postpaid. By express, peck $1.25, bushel $4.00, net. No discount allowed.

MUSHROOMS

The comparative ease with which a crop of Mushrooms can be grown in an ordinary house cellar, woodshed or barn, and the astonishing success of so many who have taken up this new industry, both for profit and their own use, gives them well-deserved popularity.

English Mushroom Spawn—It comes in bricks of about one and a quarter pounds each. These, before planting, are usually divided into a dozen parts, and the pieces inserted in the bed eight to ten inches apart each way.

Prices on Spawn are net, and not subject to discount. Per single brick, 25 cents, postpaid. By express or freight: 10 lbs., $1.75; 25 lbs., $3.00; 50 lbs., $5.00. Net direct on application. "Mushroom Culture," giving full cultural directions, 10 cents.

Price, 20 cents each, three for 50 cents.

MISS ALICE ROOSEVELT

No. 2. This magnificent variety is superb in every way, and was the sensation of the year in Paris. The flower is a Japanese incurved, with broad petals, and is as solid and firm as if cut out of ivory, lasting indefinitely when cut; beautiful snow-white in color, with a good stem and grand foliage of medium height. Price, 20 cents each, three for 50 cents.

MRS. MARY MANN

No. 3. This beautiful novelty has made a grand showing at the recent fall Chrysanthemum shows. It has proven a very profitable commercial variety, which indicates how easy to grow and handle it is for the amateur. It is a seedling from Marie Liger, which is a strong recommendation for its great size and beauty. Has a perfect siem and elegant foliage of fine globular form, with broad, incurving petals; the color is an exceedingly beautiful shade of rose-pink, florets lying so as to show the brighter shadings to the best advantage and pleasure to the eye. Winner of the "100 bloom" class at Chicago. Price, 20 cents each, three for 50 cents.

SPECIAL OFFER—We will mail you, free, the Three New Superb Imperial Chrysanthemums for 60 cents; three sets for $1.25, postpaid.

OUR "CREMO" SET OF THE BEST UP-TO-DATE NEW CHRYSDANTHEMUMS

Price, 15 cents each, two for 25 cents, any six kinds for 50 cents.

SPECIAL OFFER—The Entire Set of 14 Chrysanthemum Novelties for $1.00, Net, Postpaid.

(Le) Grand Precoce—Deep, shining yellow, occasionally striped bright red; the largest yellow of its date, and a beautiful flower.

Beatrice May—Extra large incurved, perfectly finished, an easy doer and a beauty; has drooping outer petals, snow-white, sometimes flushed pink; scored ninety-five points. This is the best white of its date by far; a splendid commercial, and as fine as the best exhibition whites.

Clementine Tousey—(The Early Chadwick.) The bloom is the largest obtainable white for the date, having received C. S. A. certificate on October 8th. It is one of the most lasting varieties, either on or off the plants; has splendid stem and foliage; can be planted close and bring every flower perfect; just about the color of Chadwick.

Miss Alice Byron—The finest midseason white for general use; early midseason; very lasting; must be cut eight to ten inches from the ground on account of its woody stem.

Miss May Seddon—Pure white, of the daintiest finish, with narrow level or slightly reflexing petals; of beautiful dwarf habit; good foliage; comes recommended as the largest Chrysanthemum bloom extant, being ten inches in diameter and fully as deep; needs early planting.

Mrs. C. Hazen—Fine salmon-buff, an exquisite shade; early; brings enormous light yellow flowers; one of the prettiest of "other" colors; incurving petals, narrow and grooved, with long, drooping outer petals.

Mrs. Geo. Beech—A deep golden-yellow sport from Mrs. Swinburne (the only yellow sport from a white variety that we have ever noticed as having this deep brilliant color); a perfectly globular, incurving form of the largest size.

Matchless—Magnificent red, blooming by the middle of October; reflexed in form; very easy to grow, and a wonderful keeper.

Mrs. Jas. Marshall—Japanese incurved of fine rounded form and large size; color a fine pink; a good commercial variety; easy to grow, and an early midseason variety.

Mrs. Jno. E. Dunne—a term-cotta with enough pink and golden yellow to fairly make a shine; dwarf in growth, of splendid habit, with stiff stems and good foliage; very large, and every petal showing the color to the best advantage; a beautiful flower.

Mrs. W. Knox—Deep yellow of beautiful shade; easy grower, of good habit; very broad, with level, reflexed petals; very fine for exhibition, where size and breadth counts for so much.

Roi d’Italie—This variety is an extremely handsome yellow of very brilliant color, incurred in a fine compact globe of rather narrow petals; has a splendid stem and foliage; grand for exhibition, with all points strongly developed; the best yellow by far for its date.

Souvenir de Comtesse Belle—The most striking of the Pins set; no exhibitor can afford to be without it. A very large bloom, with long, drooping, twisting petals of rosy-amethyst color, with reverse of silver; curling tips of white; very odd.

T. Richardson—The creator, Mr. Wells, says, "This should please those who like large things." Color soft daybreak-pink; has long, spreading florets; a very impressive flower.
How to Have Success With Flowers

THOUSANDS of our friends and customers do not know what to do with their flowers when they are received from us, and often after a successful start has been made, the plants die because they are not given the right treatment. Sometimes you read a cheap and unreliable floral magazine, and the result is that you lose your flowers.

All plants are too expensive to lose, no matter how cheaply they may be bought. Not many people can afford to experiment. They must know **just what to do and when to do it.** We have always taken an interest in our customers' success and have now made arrangements which we think you will appreciate.

Here in Springfield is published **FLORAL LIFE,** a flower magazine that is thoroughly reliable and up to date in every particular. It will answer your questions, solve your problems, tell you what soil and fertilizers are best and help you to get rid of insect enemies. It is **a complete guide to home flower growing.**

The publishers charge 50 cents a year for **FLORAL LIFE.** On the other side of this sheet, however, we are offering to give a year's subscription for this most excellent flower magazine to every person who buys one of the collection of plants or seeds. **These offers have never before been equalled by any florist.**

But wait a minute. All of our friends will not want one of these collections of plants. If you do not, you may **add only 25 cents to any order you send us,** and we will pay the publisher what is necessary, so that **you may have this 50 cent flower magazine for a full year.**

Your success is ours; if you succeed, we will. Be sure you get **FLORAL LIFE** on one of these offers.
